Family Emergency & Legacy Binder - Print & File

Free working edition 0.12 | November 2, 2026 | David Tom Publishing

A household reference you can build one useful handoff at a time. Choose a question someone may need to answer, record where the current information lives, and test the route with a trusted helper.

Included: all 46 established worksheet records and 18 pocket-cover records, with their existing codes and blank fields. Longer records span several physical pages for readable labels and writing room. The minimum-handoff PDF is a subset, not an additional product you need to buy.

Keep completed copies private. This binder is an organizer, not a will, trust, power of attorney, medical order, beneficiary designation or grant of account access. For an immediate life-threatening emergency in the United States, call 911; do not delay for this workbook.

Start with the separate minimum-handoff pack or the seven records named in 00-B. Use the complete edition as a reference and add only relevant sections. A record marked unknown with a next action is more useful than a guessed answer.

No hardware, physical delivery or online vault is included. The separate online builder is not activated or certified by these documents. The attorney-preparation and home-inventory working editions at davidtompublishing.com are optional companions; keep one master record and use references rather than duplicate sensitive details.

Print one test section first. Letter and A4 files have a 64-point left margin for binding, but actual printer scaling and hole-punch fit need checking. Read the source and review notes at X-B before relying on this edition.

This subset contains the seven minimum-handoff records, welcome/setup/index pages, continuation record X-A and sources X-B. Pocket covers are in the complete edition.

00-A - Family Emergency & Legacy Binder

A practical handoff guide for the people you trust.

Record the essentials. Add the right documents. Walk someone through the plan.

Private when completed. Keep this binder secured; display only the separate emergency sheet. This workbook is an organizer, not a will, trust, power of attorney, medical order, or beneficiary designation.

US-oriented edition. Adapt emergency numbers and obtain local professional advice outside the United States. You may skip any section that does not apply.

00-B - Set up your binder

Start small. The first useful version does not need every page completed.

This downloadable Print & File working edition contains 46 worksheet records and 18 pocket-cover records. Some records span more than one printed page. Page codes, rather than physical page numbers, connect the files. No physical binder, pocket hardware or online service is supplied.

Minimum handoff: start with 01-A, 02-A, 04-A, 07-A, 08-A, 09-A and 11-A. The separate minimum-handoff pack includes these seven records plus introductory and source notes. Mark information reviewed only after checking it. A blank does not mean no record exists.

Write by hand or use the editable Word copy. These PDFs have no fillable fields and perform no automatic actions. Completed files are not encrypted by this workbook; check your device storage and sharing settings.

Print a small single-sided sample at actual size on the matching Letter or A4 paper. Check writing space, print scaling, page turns and hole-punch clearance with your own binder before a full print run. Physical fit has not been tested here.

Put matching pocket covers behind their numbered sections. A cover is an index, not a physical pocket. Record every included copy and the original location in section 18. Keep sensitive originals separately as advised.

Never write passwords, PINs, recovery codes, Social Security numbers, full financial account numbers, seed phrases or private keys in this binder. Use non-secret location references. Keep secret recovery materials separately secured.

Ask a trusted helper to find the first-call contact, original-document locator, next bill and approved access route without coaching. Use 21-A and 21-B to record gaps, corrections and the next review.

Use X-A for longer answers or copy the relevant record again. Write the parent page code and record identifier on every continuation. There is no need to finish every section before making one useful handoff.

01-A - Start here

For the trusted person using this binder. Complete this page before the detailed records.

For immediate danger or a life-threatening emergency in the US, call 911. For an anticipated death under hospice, follow the written hospice plan and contact the hospice team. [S2]

Do not move money, distribute property, impersonate the account holder, or cancel key services based only on this binder. Confirm your authority and the provider process first. [S1]

07-A - Legal document locator

Record what actually exists and where the signed originals can be found.

This workbook does not create or amend these documents. Do not remove staples, mark up, discard or replace signed originals based on this organizer. Ask the attorney how originals and copies should be stored.

ADD COPIES | Pocket 07-LEGAL Clearly labeled reference copies, or location slips when the documents are stored separately.

08-A - Financial account map

A directory, not permission to transact. Repeat for every institution and account type.

Consider checking, savings, brokerage, retirement plans, pensions, education savings, health savings, cash-value policies and digital-asset platforms. Do not assume accounts at the same institution have the same ownership or beneficiaries.

ADD COPIES | Pocket 08-FIN Recent dated statements or location slips; redact unnecessary full numbers on convenience copies.

11-A - Digital emergency access plan

An access roadmap, not a password notebook. Arrange access while you can test it.

Keep master passwords, recovery codes, private keys and seed phrases outside the general binder. Do not make the only recovery instructions available solely inside the locked account they recover.

Apple Legacy Contact does not provide iCloud Keychain passwords or passkeys. Google Inactive Account Manager shares selected data after inactivity; it is not an immediate password handoff. [S3-S5]

ADD COPIES | Pocket 11-ACCESS Non-secret recovery roadmap and provider instructions only. Keep secret recovery material separately.

Password manager / account owner	**Approved emergency contact / phone**
Emergency access feature / status / wait period	**Last successful check / checked with whom**
Separate secure recovery kit location reference	**Recovery kit custodian / phone**
Primary email / recovery route reference	**Phone service needed for account recovery**
Authenticator / passkey / hardware-key plan reference	**Encrypted device recovery-key location reference**
Independent access route if the phone, email or password vault is unavailable	**Who should receive access, limits, and provider or legal steps to confirm**

X-A - Continuation / custom record

Repeat as needed and file beside the related page, not only at the back of the binder.

Sources rechecked November 2, 2026. Citation gaps retain the established source IDs; older S6/S8 search-only references are not relied on in this edition. Hospice references are prompts to follow the person's actual written care plan, not a universal medical procedure. Beneficiary fields organize questions; they cannot change a provider's records.

Free public working edition 0.12, derived from the existing DTP 0.10 field schema. No listed source endorses DTP. This organizer does not provide legal, tax, investment or medical advice, create authority or guarantee access. No qualified professional signoff is claimed.

Reader, native Word, physical-print and assistive-technology acceptance remain open. PDFs are untagged; no PDF/UA compliance is claimed. The editable Word file is an alternative format, not a claim of completed accessibility testing.
